Installation of MPI on Mac OS

1. Install the GNU compilers
   Refer to https://www.youtube.com/watch?v=O6WuGENLF18 for detailed instructions.

2. Install Open MPI
   Refer to https://wiki.helsinki.fi/display/HUGG/Open+MPI+install+on+Mac+OS+X for detailed instructions.

   (If you get “checking whether the C compiler works… no” error, you need to type “sudo xcodebuild –license” in your terminal to accept the xcode license)
